Alder is the lowest upfront-cost option that meets the 200 km minimum range

Four shuttle options compared on the same criteria. Cedar costs least upfront but falls 10 km short of the minimum range.

Option	Range (km)	Meets 200 km minimum?	Upfront cost (USD thousands)	Est. annual energy cost (USD thousands)
Alder	**210**	**Yes**	**38**	**4.2**
Birch	240	Yes	44	3.9
Cedar	190	No (10 km short)	35	4.5
Dogwood	220	Yes	47	3.8

Answer: Alder, at USD 38k upfront, is the lowest cost among options that meet the 200 km minimum (Birch USD 44k, Dogwood USD 47k). It is not the best on every criterion: Birch has the longest range and Dogwood the lowest estimated annual energy cost.
