PROCUREMENT • DECISION AT A GLANCE

Alder is the lowest-upfront-cost option meeting the 200 km minimum

Minimum required range: **200 km** · Costs shown in **USD thousands**

Among qualifying options: Alder — 210 km range · $38k upfront

Option	Range (km)	Upfront (USD thousands)	Annual energy (USD thousands)
Alder MEETS MINIMUM	210	38	4.2
Birch MEETS MINIMUM	240	44	3.9
Cedar BELOW MINIMUM	190	35	4.5
Dogwood MEETS MINIMUM	220	47	3.8

Decision boundary: Cedar has the lowest upfront cost overall ($35k) but falls 10 km short, so it does not qualify. Alder is not lowest on annual energy cost. **Estimate caveats:** annual energy costs assume 18,000 km of service per vehicle; maintenance and charging-infrastructure costs are excluded. All figures are fictional estimates from the same procurement worksheet; no uncertainty ranges were provided.
